1	C. Scope of	c) Uptime guarantee: Uptime of the equipment's will be 99%. This will be calculated on monthly basis.	Request honourable members to clarify - uptime will be calculated for network or device, network uptime can be possible but the asked 99% uptime for devices is not possible without HA/Standby devices. Bidder will need to consider redundant/standby device to maintain the uptime SLA which will add the additional cost. Kindly clarify do we need to factor standby device or not.	No change in RFP Clause. SLA will be calculated on quarterly basis.
